# Total Productive Maintenance (TPM)

Course Duration: 2 Days

## Seminar Content

Activities and components of a Productive Maintenance program are explored. This course shows how to maintain manufacturing systems in relation to scheduling, production, process control, and delivery constraints; 2-Day Seminar.

## Learning Objectives

- Overview of the documentation and disciplines necessary to fully participate and succeed in preventive maintenance activities.

## Seminar Outline

- Overview and History
- Assessment of where you are and where you need to be
- How to get started
- When and how to get the pieces together for a Productive System
- Teams and Maintenance
- Working with Purchasing, Production, Engineering, and Scheduling
- When will it be done?
- What is Continuous Improvement?

## Who Should Attend

Facilities, Maintenance, Production, and Engineering Managers responsible for designing, purchasing, maintaining, and improving the facilities and processes at the core of the manufacturing business.

## Seminar Materials

Seminar manual and Best-in-Class Level I template to apply to the participant's company; includes ten procedure process flow diagrams.

## Pre-Requisite

General knowledge of maintenance and facility management and of team building and active participation in manufacturing activities.
