IATF 16949:2016 Internal Auditor Training for Automotive Quality Management Systems

Course Duration: 4 Days

Seminar Content

Although the ISO 9001 requirements have been removed from IATF 16949 Automotive Quality Management System requirements and are published as a separate ISO standard, IATF 16949 is not a stand-alone standard and must be used in conjunction with ISO 9001, so Omnex is continuing to offer courses that cover both the ISO 9001 and IATF 16949 requirements.

Omnex is an Exemplar Global Certified TPECS provider for Exemplar Global QM and AU Competency Units. This four-day course has been developed to satisfy the Exemplar Global QM and AU Examination Profiles and, as such, all attendees who successfully pass the exams during this course will achieve a Certificate of Attainment for the following competency units:

- ❖ Exemplar Global QM
- ❖ Exemplar Global AU

***FOR PUBLIC TRAINING ONLY** - The requirements portion of this training is conducted online prior to the in-classroom or virtual course. The seated or virtual classroom portion of the class will begin on Tuesday morning with a review and testing. The Monday of that training week will be offline and for finishing the e-learning or contacting the instructor with questions. The auditor portions (AU and TL) will continue as appropriate according to the dates scheduled.

This four-day course was developed to cover all requirements of both the ISO 9001 and IATF 16949 standards. Due to the new IATF 16949 requirements for Internal and Second Party Auditors (clauses 7.2.3 and 7.2.4) regarding Core Tools and Customer-Specific Requirements, this course has been expanded to a fourth day.

Group exercises and case studies with examples from the automotive industry will be used to develop the required auditing skills. The auditing guidelines of ISO 19011—including the auditing process and methodologies, e. g., planning and conducting an audit, writing nonconformity statements, preparing an audit summary and report, and verifying corrective actions-and their application in the automotive process approach are covered. Auditing case studies from the automotive industry to develop skills for identifying nonconformities will be used.

Learning Objectives

- ❖ Understand the application of quality management principles in the context of ISO 9001 and IATF 16949.
- ❖ Relate the quality management system to the organizational products, services, activities and operational processes.
- ❖ Relate organization's context and interested party needs and expectations to the planning and implementation of an organization's quality management system.
- ❖ Understand the application of the principles, procedures and techniques of auditing.
- ❖ Understand the conduct of an effective audit in the context of the auditee's organizational situation.
- ❖ Understand the application of the regulations, and other considerations that are relevant to the management system, and the conduct of the audit.
- ❖ Practice personal attributes necessary for the effective and efficient conduct of a management system audit.
