Understanding Soldering System Assessments (CQI-17)

Course Duration: **2 Days**

Seminar Content

This one-day seminar is intended to provide participants with an overview of CQI-17, Special Process: Soldering System Assessment, which, along with internationally recognized quality management system standards and customer-specific requirements, defines the fundamental requirements for a soldering management system. The goal of the Soldering System Assessment is the development of a soldering management system that provides for continual improvement, emphasizing defect prevention and the reduction of variation and waste in the supply chain.

Learning Objectives

- Understand the scope of the Soldering System Assessment
- Prepare to conduct an assessment of a soldering system in order to ensure it provides for continual improvement, emphasizing defect prevention and reduction of variation and waste in the supply chain

Seminar Outline

- Introduction and Overview
- Assessor Requirements
- Coating System Assessment Procedure
- SECTION 1: Management Responsibility and Quality Planning
- SECTION 2: Floor and Material Handling Responsibility
- SECTION 3: Equipment
- SECTION 4: Job Audit
- Process Requirement Tables

Who Should Attend

All team members involved in the soldering management system would benefit from this seminar.

Seminar Materials

Each participant will receive a training manual. A copy of CQI-17 may be provided upon request, with additional cost billed to the participant.

Pre-Requisite

Experience in the assessment of soldering management systems would be beneficial.
