

Hemant Kumar, General Manager, Omnex quality academy based at Chennai. He is a Mechanical Engineer from Birla Institute of technology and science and has over 20 years of professional experience specialising in TQM, TPM, Training & development and Maintenance. He started his career at Sundaram-Clayton Limited (SCL), Brakes division in 1994 as Maintenance engineer to implement the PM systems. After his successful role in maintenance, he then moved on to the core manufacturing area for implementing PPC and TPM to improve key business measures of manufacturing. During this period, he has played a vital role in getting Deming prize, JQM award and TPM award for SCL-Brakes Division (WABCO India Limited). After his successful career of 12 years in SCL-Brakes Division, he joined SCL- Die casting division to Head – TQM. In TQM, he was responsible for the integration and implementation of key management processes - policy management, daily management and standardisation, continuous improvement & Total employee involvement (TEI) and people development to achieve business results consistently and customer satisfaction. He established a good skill development centre for on-job training on manufacturing, maintenance and application on tools and techniques. Through cross functional team working, he continuously upgraded the training and development process using PDCA cycle to meet the business needs. He was able to put the company-wide TPM in real practice to get TPM excellence award from JiPm for die casting plant (1st in India). After getting this award, he was moved to SCL new plant at Oragadam plant as a plant head to establish world class manufacturing system.

Key expertise

- TQM
- Policy management & Daily management
- TPM & 5S improvement management
