

Shaharum Ashaari

Consultant

Major highlights

- Honorary Productivity Practitioner Certification by APO in 2015
- Awarded as Malaysian Productivity Specialist by MPC in 2014.
- Certified Lean Champion by MPC in 2015
- Lean proficient and a Six Sigma Certified Black Belt

Consultant Profile

Shaharum Ashaari

Consultant

Shaharum Ashaari is a consultant who specializes in Productivity and Quality Improvement initiatives such as Six Sigma Strategy, Lean Thinking and Kaizen with clients spanning from Public Service Sector, Automotive, Electronics, Travel Agencies, Food and Beverage Industries, ICT, Academia and Insurance Agency.

Key expertise

With a modest 16 years of working experience, he has consulted a number of organizations to optimize their business processes via several methodologies that include Industrial Engineering, Total Quality Management and Kaizen. He has accumulated years of experience in Lean and Six Sigma deployment in various types of industries; customized the approach to suit different process disciplines such as procurement processing, insurance underwriting, software development, research and development etc. He has also delivered quite a sum of training such as Balanced Scorecards, Key Performance Indicators, Change Management, Value Stream Mapping, Time & Motion Study, Statistical Process Control, Advanced Data Analysis, Design of Experiment etc. His audiences often describe him as a dramatic and dynamic presenter in sharing his thoughts and understanding about productivity and quality.

He started his career as a Quality Engineer cum Six Sigma Black Belt with an electronics manufacturer. During his tenure-ships with the organization, his responsibility is to optimize the manufacturing processes to meet stringent product requirements of fully-robotized modern manufacturing line also known as “factory of the future” at that time.

He then joined automotive industry as a Six Sigma Black Belt where he had further opportunity to experience different manufacturing challenges, diversifying his experience in process optimization projects which include process efficiency, product compliance, material localization, product enhancement, energy and material conservation etc. He has been described by the management team as energetic and persistent in exceeding the organization's objectives living the continuous improvement culture. He has been experimenting and practicing various industrial engineering techniques to develop low cost and innovative solutions during the period.
